2) EzLogin Lite Installation Instruction

Follow the below instructions before installing EzLogin (Step 1 and Step 2)

Step 1 :

Disable all Cache in Magento admin panel.

Visit **Admin Panel > Menu > System > Cache Management.**

Cache Storage Management Flush Magento Cache Flush Cache Storage

Select All | Unselect All | Select Visible | Unselect Visible | 0 items selected Actions Refresh Submit

Cache Type	Description	Associated Tags	Status
<input type="checkbox"/> Configuration	System(config.xml, local.xml) and modules configuration files(config.xml).	CONFIG	DISABLED
<input type="checkbox"/> Layouts	Layout building instructions.	LAYOUT_GENERAL_CACHE_TAG	DISABLED
<input type="checkbox"/> Blocks HTML output	Page blocks HTML.	BLOCK_HTML	DISABLED
<input type="checkbox"/> Translations	Translation files.	TRANSLATE	DISABLED
<input type="checkbox"/> Collections Data	Collection data files.	COLLECTION_DATA	DISABLED
<input type="checkbox"/> EAV types and attributes	Entity types declaration cache.	EAV	DISABLED
<input type="checkbox"/> Web Services Configuration	Web Services definition files (api.xml).	CONFIG_API	DISABLED
<input type="checkbox"/> Web Services Configuration	Web Services definition files (api2.xml).	CONFIG_API2	DISABLED

Step 2 :

Disable Compiler in Magento admin panel.

Visit **Admin Panel > Menu > System > Tools > Compilation.**

Compilation Run Compilation Process

Compilation State

Compiler Status	Disabled
Compilation State	Not Compiled
Collected Files Count	0
Compiled Scopes Count	0

Step 3 :

- 1) Copy the file **app/etc/modules/Velanapps_Ezloginlite.xml** under **app/etc/modules**
- 2) Copy the folder **app/code/community/Velanapps** under **app/code/community**

- 3) Copy the file **app/design/frontend/default/yourtheme/layout/ezloginlite.xml** under **app/design/frontend/default/yourtheme/layout**
- 4) Copy the folder **app/design/frontend/default/yourtheme/template/ezloginlite** under **app/design/frontend/default/yourtheme/template**

Note : Code has to be copied in specific files in steps 5, 6, 7.

- 5) Copy the code in the file **app/design/frontend/default/default/template/page/template/links.phtml** into your **app/design/frontend/default/default/yourtheme/template/page/template/links.phtml** file
- 6) Copy the code in the file **app/design/frontend/default/default/template/persistent/checkout/onepage/login.phtml** into **app/design/frontend/default/yourtheme/template/persistent/checkout/onepage/login.phtml**
- 7) Copy the code in the file **app/design/frontend/default/default/template/persistent/customer/form/login.phtml** into **app/design/frontend/default/yourtheme/template/persistent/customer/form/login.phtml**
- 8) Copy the folder **media/ezloginlite** under **yourwebsiteroot/media/ezloginlite**

All the files to be copied are placed in same folder structure as they need to be placed.

Step 4 :

Add write permission to the folder **media/ezloginlite**.

(This is an important step)

3) Application Creation - Social Accounts

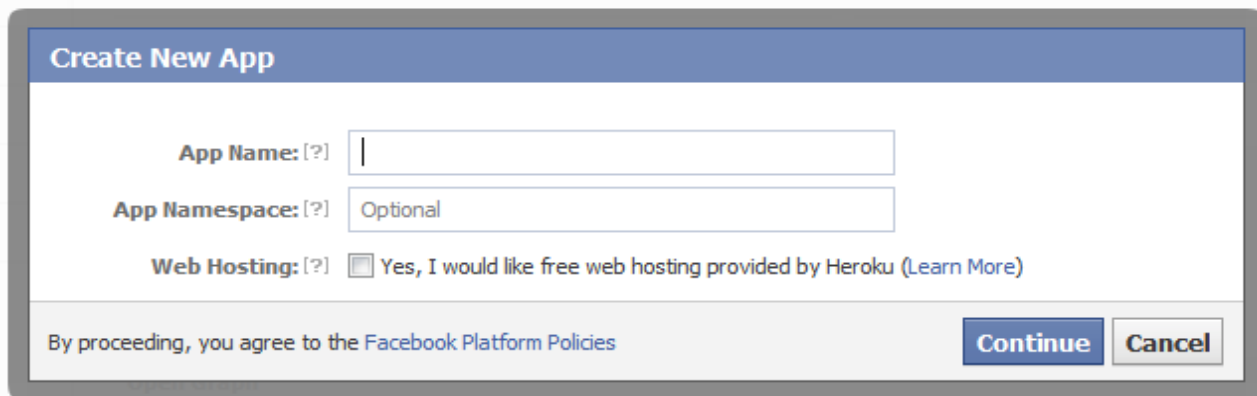

3.1 Face book

Step 1 :

Log into your Facebook account, with the URL <http://developers.facebook.com> and click option "**Apps**" from the top menu.

Step 2 :

Create a new Facebook application for EzLogin Extension using the below steps. Click "**Create New App**", Enter the required fields and click "**Continue**".

Note : The App name should be your website's name or your company name.

Step 2 :

Fill the fields for application usage with web language, PHP for Magento (email address is optional).

Host your site with Heroku

Environment: **PHP**

Email Address:

If a Heroku account with this email address does not exist, one will be created

Step 3 :

Application Id and Secret Key :

Facebook will provide the user with an App Id and App Secret code.

User has to register the domain URL (in the below directed field).

Apps ▶ ▶ Basic

 **App ID:** **App Secret:** (reset) **Get your Application ID & Secret Key**

Basic Info

Display Name: [?]

Namespace: [?]

Contact Email: [?]

App Domains: [?]

Hosting URL: [?]

Sandbox Mode: [?] ☐ Enabled ☒ Disabled

Select how your app integrates with Facebook

☒ **Website with Facebook Login** ☒ **Register your domain Url**

Site URL: [?]

The Application ID, Application Secret can be configured in the EzLoginlite settings.

4. EzLoginlite Extension Admin Panel Configuration

The EzLogin extension will be found in **Dash Board > System > Configuration > Ezlogin** (inside Magento admin panel).

Powered By	<input type="text" value="Disable"/>	[STORE VIEW]

4.1 Social Account Configuration :

Enable / Disable :

User can enable / disable social accounts in admin panel.

Facebook Application Id and Secret Key :

Store owner need to fill out application id, application secret can be configured in this section.

Facebook Login Image Settings :

Store owner can easily modify the Facebook Login icon (shown in front end) by uploading a facebook login icon in this section.

Facebook Login Icon URL Re-Write Settings :

Store owner can modify the url of each Social Network Login icon based on their SEO needs.

Facebook Login Icon Size Settings :

The height and width of Social Network Login icons can be modified by configuring height and width in this section. (Owner need not to edit code to do this).

Powered By :

Disabling this option would remove the "Powered by : Velanapps.com" text shown under the Social Login icons in front end.
